Getting ready to use Aeropphone Brisa Plus

Connect the “Aeropphone Brisa Plus” app that you installed on your mobile device with the Aeropphone Brisa via Bluetooth®.

* If you are connecting a device via Bluetooth that uses Android 6.0 or later, you need to activate location data on the Android device.

Connecting to the Aeropphone Brisa

1. Turn on the Aeropphone Brisa.

The power indicator (orange) lights up.

MEMO

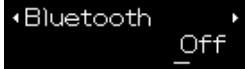

If you have more than one Aeropphone Brisa, turn on only the unit that you want to connect (turn off all others).

2. Set the Bluetooth setting of the Aeropphone Brisa to “On”.

The Bluetooth setting of the Aeropphone Brisa is set to “Off” and the Bluetooth indicator (blue) is off when using the factory settings.

Follow the steps below to set the Bluetooth setting to “On”.

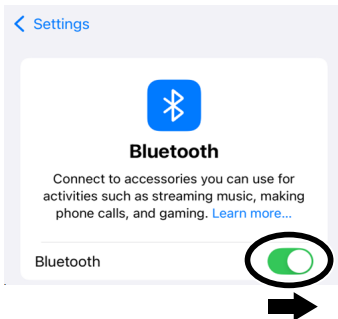

1. Press the [MENU] button.
2. Use the [◀] [▶] buttons to select “Bluetooth”.

If “Off” is shown, press the [MENU] button and then press the [▶] button to select “On”.

3. Place the Aeropphone Brisa close to the mobile device that you want to connect.

4. Turn on the Bluetooth function of the mobile device.

* The display depends on the device you're using.

NOTE

Do not tap the "AE-BRISA" text shown in the Bluetooth settings screen of the mobile device. If you've tapped it, tap the "i" located beside "AE-BRISA connected" in the mobile device's screen, tap "Forget This Device" and start again from step 1.

5. Launch Aerophone Brisa Plus.

6. Select "Connect Aerophone Brisa".

The scan starts automatically.

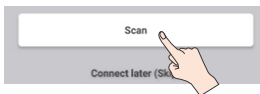

NOTE

If you're using an Android device, the message "Allow Aerophone Brisa Plus to access this device's locations?" may be shown when you first launch the app. Select "Allow" so that you can use the Bluetooth functionality in this app.

Getting ready to use Aerophone Brisa Plus

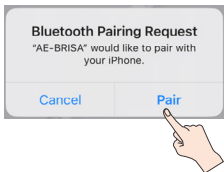

[Contents](#)

- * If the scan is not successful, tap the "Scan" button on the screen.

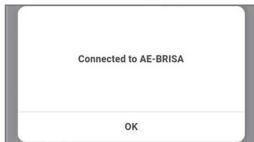

- * If more than one Aerophone Brisa is detected that can be connected, a selection screen appears.

7. If you see a pairing confirmation message, tap "Pair".

- * The display depends on the device you're using.

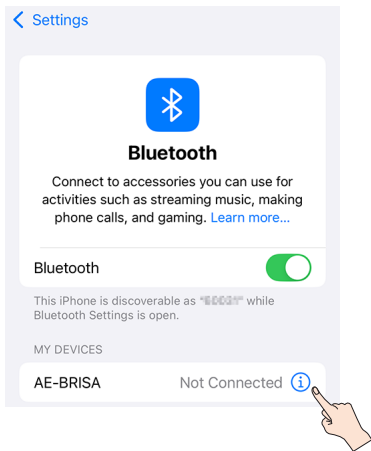

8. Once you see the message "Connected to AE-BRISA", tap the [OK] button.

If the connection fails

If the connection fails, such as AE-BRISA not appearing after scanning, or not connecting when you tap the AE-BRISA you want to connect, try the following steps.

1. From the Settings app on your mobile device, open the Bluetooth settings and tap “i” when AE-BRISA appears to delete the pairing information.

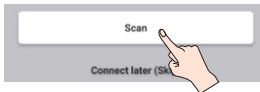

* The display depends on the device you're using.

2. Initialize Bluetooth on the Aerophone Brisa.

1. Press the [MENU] button.
2. Use the [◀] [▶] buttons to select "Pro Menu", and then press the [MENU] button.
3. Use the [◀] [▶] buttons to select "Initialize", and then press the [MENU] button.
4. Use the [◀] [▶] buttons to select "Bluetooth", and then press the [MENU] button.
5. Press the [▶] button to initialize.
6. Turn the power of the Aerophone Brisa off and then on again.

3. Tap "Scan" on the Aerophone Brisa Plus screen.

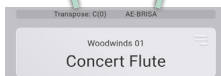

4. Continue from step 7 of "Connecting to the Aerophone Brisa".
